Week beginning

06.05.24

Year 5 Newsletter

Last week we were learning....

...about Science! The children stepped into the role of a scientist and explored reversible and irreversible changes - they enjoyed watching and discussing how 'Elephant Toothpaste' is an irreversible change! During computing lessons, the children showed a real love of learning when discussing our new unit, 'Game Creator'. They had an opportunity to test a variety of games, and the different features, which they really enjoyed. This will then help them when they create their own games. We wonder what amazing games they will come up with...

This week we will be learning....

The children will get to meet Kensuke in Chapter 5. Will their predictions about Kensuke be correct? What type of character will he be: hero or villain? Why is he on the island? Is he alone? What is his importance to the story? All of these questions will be explored and the children will discuss and write a dialogue between our main characters. The children have been enjoying PE and learning the skills required for cricket. We have seen superb determination and unity during the lessons- they can't wait to transfer the skills into a game, which the children are very excited about!

Don't Forget!

Homework is due on a Monday so please remember to bring in your CGP book in. Also please remember spelling books.

Remember to read four times at home each week which will lead to the children earning a tick towards their reward certificate.

Home Learning...

Homework is set every MONDAY and due in the following Monday. This week Year 5 have the following online tasks to complete:

MyMaths: Lines of symmetry

Spelling Shed: Homophones

CGP – Page 64, punctuating speech in two parts.

Spellings

This week, our spellings are:

Word
aisle
isle
